KNR 298.14 - Practicum IV			
Code	Description	Instructed	Evaluated
CIP-4	Perform a comprehensive clinical examination of a patient with an upper ... extremity, lower extremity, head, neck, thorax, and/or spine injury or condition. This exam should incorporate clinical reasoning in the selection of assessment procedures and interpretation of findings in order to formulate a differential diagnosis and/or diagnosis, determine underlying impairments, and identify activity limitations and participation restrictions. Based on the assessment data and consideration of the patient's goals, provide the appropriate initial care and establish overall treatment goals. Create and implement a therapeutic intervention that targets these treatment goals to include, as appropriate, therapeutic modalities, medications (with physician involvement as necessary), and rehabilitative techniques and procedures. Integrate and interpret various forms of standardized documentation including both patient-oriented and clinician-oriented outcomes measures to recommend activity level, make return to play decisions, and maximize patient outcomes and progress in the treatment plan.		
CIP-4a	upper extremity		
CIP-4b	lower extremity		
CIP-4c	head		
CIP-4d	neck		
CIP-4e	thorax		
CIP-4f	spine		
CIP-7	Select and integrate appropriate psychosocial techniques into a patient's ... treatment or rehabilitation program to enhance rehabilitation adherence, return to play, and overall outcomes. This includes, but is not limited to, verbal motivation, goal setting, imagery, pain management, self-talk, and/or relaxation.		
PHP-7	Implement disinfectant procedures to prevent the spread of infectious ... diseases and to comply with Occupational Safety and Health Administration (OSHA) and other federal regulations.
